- **Full Context**
Data presented as the user experienced (Web, Voice, Files, Emails, Chats, etc.)

30-Day Evaluation NetWitness 7

Try NetWitness 7

The trial provides you with a fully-functional version of NetWitness 7 that you can run and test out on your network. While it includes all of the features available in a fully licensed version, the trial version will expire 30 days after you launch it for the first time.

Key Benefits

Based on over 9 years of development, the patented collection, processing, and analytical methods of NetWitness 7 provide deep insight into network entities, their behavior at the application layer, and provides the actual session content for analysis. The network context that NetWitness 7 provides is unlike any other product available, because it was designed from the ground up to model and analyze traffic, not simply "monitor" it.

Technical Specifications and Requirements

- Windows XP or 2003 Server
- 1GB RAM (2GB or more recommended)
- Single 3GHz Intel or AMD Processor (Dual Core Recommended)
- 1 Ethernet Port
- Internet Explorer v6
- Ample data storage for network collection

About NetWitness

NetWitness simplifies the process of identifying and investigating complex network threats through a cost-effective infrastructure of data recorders and a versatile suite of analytic applications.

NetWitness software significantly reduces time to resolution and provides a comprehensive contextual view into the extent of any threat or breach in security.
